## **Thank you for your purchase!**

We've worked hard to create the healthiest rug for your family and we're so happy you'll be enjoying it in your home. It's made from 100% pure, undyed premium wool sheered from New Zealand sheep and the cleanest, recycled materials.

## **Happy Sheep Live in New Zealand**

New Zealand sheep produce the softest wool. Why? Because they're not stressed! New Zealand sheep roam around freely, feeding on grass, breathing clean air, and they're herded by special sheep dogs that don't even bark. They lead quite happy lives. And happy sheep equal happy feet.

## **Good Materials are Hard to Find**

All the materials we use are the purest we can find and because of that, we have a favor to ask. When you're done enjoying your rug, please let us come get it. We'll even pay you for it! It's getting harder and harder to find pure materials so we've made a commitment to completely recycle and reuse all the products we create.

We, at Canary, are on a journey to change the way products are made and consumed and we're so happy to have you along on the ride. Welcome to the family!

With Love,  
The Canary Family

## **Biomimicry at its Best**

Biomimicry is when you create something that's either inspired by or uses technology present in nature. Our Gecko Strips (those funky looking black and white rectangles) are biomimicry at its best. We took the suction technology gecko's use to climb walls and created strips that would stick your rug to the floor without using an adhesive.

You just have to apply pressure! That means our Gecko Strips can be used over and over again and there's no residue for you to clean nor will they damage your wood. If you find your Gecko Strips aren't sticking as well, simply clean them with dish soap and they should be good as new.

## **Reuse or Throw it in the Recycling Bin**

We take great care to ensure all of our packaging is recyclable, so when you're finished installing your rug, please find a way to reuse it or throw it in the blue bin.
